[REDACTED]

REMARKS:

25X1D

This brief identifying a tracking facility located at approximately 47°12'N/70°10'E, about 165 nautical miles west-northwest of Sary Shagan, USSR, is the result of a preliminary photographic analysis. The facility consists of an interferometer-type site and a nearby support area. The interferometer-type site is enclosed by a circular ground scar and a fence. Centered within this site are four probable domes positioned at the ends of a plus figure. The support area contains approximately 25 buildings. Adjacent to the support area is a sod landing strip, with no aircraft or maintenance facilities evident.

NOTE: Because of the poor quality of base maps of this area and the scattered cloud cover on the photography, it is emphasized that the geographic positioning of this facility is only approximate at this time.
